Mikko Hyppönen: Fighting viruses, defending the net

It's been 25 years since the first PC virus (Brain A) hit the net, and what was once an annoyance has become a sophisticated tool for crime and espionage. Computer security expert Mikko Hyppönen tells us how we can stop these new viruses from threatening the internet as we know it.

When you choose to add a payment card to Apple Pay, information you provide about your card may be collected in order to determine your eligibility and enable use of the feature. Information about your payment card, including your credit or debit card number, the name and billing address associated with your account, general information about your iTunes and App Store account activity (e.g., whether you have a long history of transactions within iTunes), information about your device (e.g., the name of your device), as well as your location at the time you add your card (if you have Location Services enabled), may be sent to Apple and provided by Apple to your card issuer and payment network in order to determine the eligibility of your card, for fraud detection purposes and to facilitate your use of the Apple Pay feature.

When you make an Apple Pay transaction, your device account number payment information will be provided to the merchant where you make a purchase. The card number from your credit or debit card is not provided to the merchant by Apple.

In addition to this information, when you choose to use Apple Pay to make payments in apps, your zip code will be provided to merchants in order to enable tax and shipping cost calculation. Other information you provide when finalizing your payment (e.g., a shipping address) will also be provided to the merchant with your consent. In order to securely transmit this information to merchants when you use Apple Pay to make payments in apps, the information is sent to Apple in encrypted form where it is briefly decrypted and re-encrypted with a key which only the merchant can read. Apple does not retain any of this information in a form that personally identifies you.

If you have Location Services turned on, the location of your iOS Device at the time you use your iOS Device to make purchases in stores may be sent anonymously to Apple and will be used to help Apple Pay improve the accuracy of business names in the Passbook card transaction history and may be retained in the aggregate to improve other Apple products and services. You may disable the location-based functionality of Apple Pay by going to the Location Services setting on your iOS Device and turning off the individual location setting for Passbook.

By using Apple Pay, you agree and consent to Apple's and its subsidiaries' and agents' transmission, collection, maintenance, processing, and use of all of the foregoing information, to provide Apple Pay functionality. Apple Pay data that has been disassociated from you may be retained for a limited period of time to generally improve Apple Pay and other Apple products and services.

Privacy Policy. At all times your information will be treated in accordance with Apple's Privacy Policy, which is incorporated by reference into this License and can be viewed at: www.apple.com/privacy/.

The Internet Has Flattened the World

- BUT... there's still one thing that creates barriers.
- And that's not always a good thing.

Language

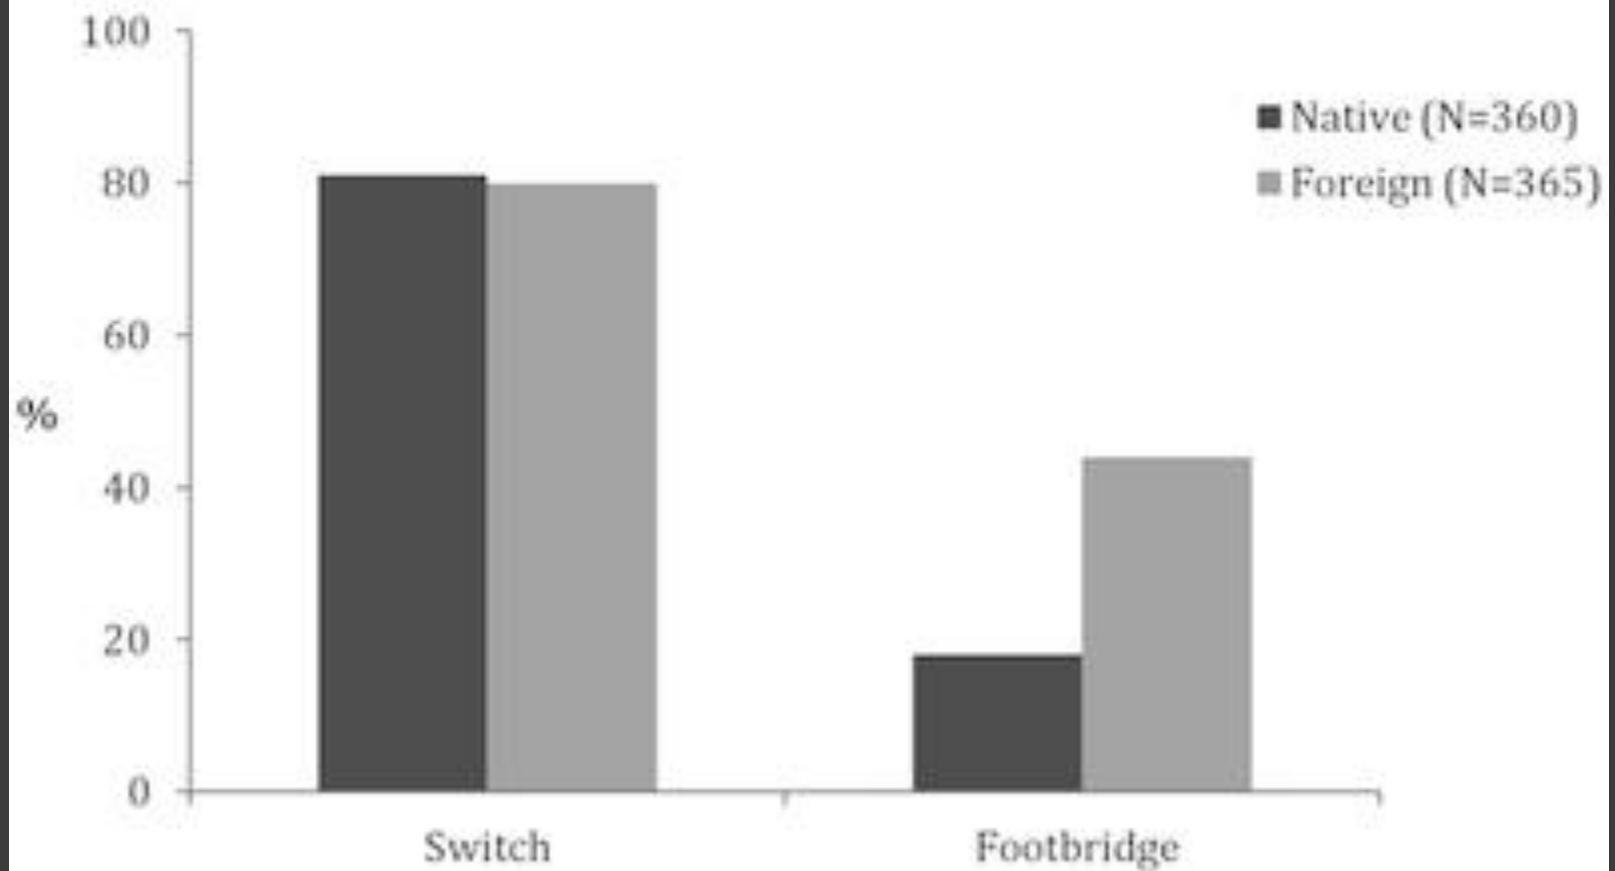

- It affects choices and decisions

Would you kill one person to save five?

This cruel dilemma pits the principle of thou-shalt-not-kill against simple math: Five is greater than one. But presumably it's a dilemma each person solves the same way each time, unaffected by superficial things like the language in which it's presented. After all, we like to think we abide by a consistent moral code.

Yet psychologists say that's not always the case. In a series of experiments, they found that people confronted with this one-for-five dilemma were far more likely to make a utilitarian choice when contemplating it in a foreign language.

Percentage of Utilitarian Choices

**Do you have

Silicon Valley's Language

Important: If you enable this feature, Chrome will listen for you to say “Ok Google” and then send the sound of the next thing you say, plus a few seconds before, to Google.

Settings

☒ Enable “Ok Google” hotword detection when on Google Search.

☐ Stop listening for “Ok Google” after 5 minutes.

This will help reduce battery consumption on a laptop.

ATTENTION!

Your computer has been blocked up for safety reasons listed below.

You are accused of viewing/storage and/or dissemination of banned pornography (child pornography/zoophilia/rape etc). You have violated World Declaration on non-proliferation of child pornography. You are accused of committing the crime envisaged by Article 161 of United States of America criminal law.

Article 161 of United States of America criminal law provides for the punishment of deprivation of liberty for terms from 5 to 11 years.

Also, you are suspected of violation of "Copyright and Related rights Law" (downloading of pirated music, video, warez) and of use and/or dissemination of copyrighted content. Thus, you are suspected of violation of Article 148 of United States of America criminal law.

Article 148 of United States of America criminal law provides for the punishment of deprivation of liberty for terms from 3 to 7 years or 150 to 550 basic amounts fine.

It was from your computer, that unauthorized access had been stolen to information of State importance and to data closed for public Internet access.

Waar kan ik een geldvoucher PaySafeCard aanschaffen?

PaySafeCards zijn vast en zeker dichtbij verkrijgbaar, in Nederland bijvoorbeeld bij veel tankstations (benzinestations), kiosken, supermarkten en sigarenwinkels. **Overzicht verkooppartners:** Trepleister, HEMA, VIDEOLAND, T-Mobile, SuperCoop, TAMOIL, PostKantoor (www.Post.nl), KijkShop (www.KijkShop.nl), Gulf, Totaal Gemak, Primera, Coop Compact, Coop, Argos, AKO, Narvesen, Free Record Shop, Total, Texaco, Spar, Shell, Q8, Esso, BP, Avia.

NSA INTERNET SURVEILLANCE PROGRAM

PRISM

COMPUTER CRIME PROSECUTION SECTION

! YOUR COMPUTER HAS BEEN LOCKED! !

Your computer has been locked due to suspicion of illegal content downloading and distribution.

The illegal content (414 Mb of photo and video files) was automatically classified as child pornographic materials.

The downloading and distribution of illegal content, in whole or in part, violate following U.S. Federal Laws:

18 U.S.C. § 2251 Sexual exploitation of children (Production of child pornography)

18 U.S.C. § 2252 Certain activities relating to material involving the sexual exploitation of minors (Possession, distribution and receipt of child pornography)

18 U.S.C. § 2252A Certain activities relating to material constituting or containing child pornography

Any individual who violates, or attempts to violate, or conspires to violate mentioned laws shall be sentenced to a mandatory term of **imprisonment from 6 months to 10 years and shall be fined up to \$250,000.**

Collected technical data

Your IP address: [REDACTED]
Your host name: [REDACTED]
Source or intermediary sites: [REDACTED]
Location: [REDACTED]

Illegal content found:

ALL SUSPICIOUS FILES FROM YOUR COMPUTER WERE TRANSMITTED TO A SPECIAL SERVER AND SHALL BE USED AS EVIDENCES. DON'T TRY TO CORRUPT ANY DATA OR UNBLOCK YOUR COMPUTER IN AN UNAUTHORIZED WAY.

Your case can be classified as occasional/unmotivated, according to 17 (U.S. Code) §512

Thus it may be closed without prosecution.
Your computer will be unblocked automatically.

In order to resolve the situation in an above-mentioned way you should pay a fine of **\$300**

Exchange your cash for a MoneyPak voucher and use your voucher code in the form below:

Code:
1 2 3 4 5 6 7 8 9 0

Status: **Waiting for payment**
Permanent lock on 09/28/2013 8:46 p.m. EST

Ransomware Encrypters

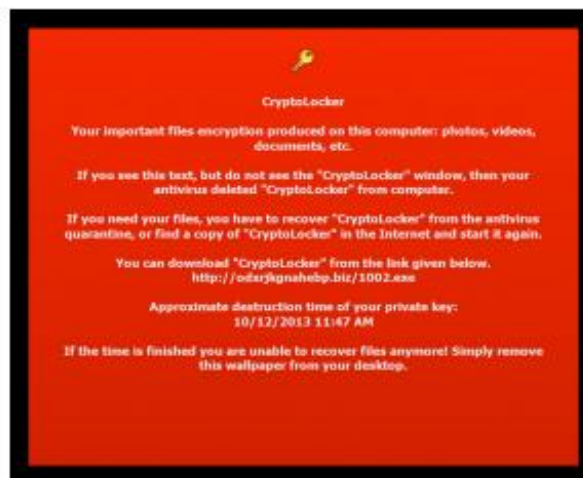

- Still haven't broadly localized their use of language.
- At least not on the payments side of things.

06 CryptoLocker Crew Ratchets Up the Ransom

NOV 13

Last week's article about how to prevent **CryptoLocker** ransomware attacks generated quite a bit of feedback and lots of questions from readers. For some answers — and since the malware itself has morphed significantly in just a few day's time — I turned to **Lawrence Abrams** and his online help forum **BleepingComputer.com**, which have been following and warning about this scourge for several months.

To recap, CryptoLocker is a diabolical new twist on an old scam. The malware encrypts all of the most important files on a victim PC — pictures, movie and music files, documents, etc. — as well as any files on attached or networked storage media. CryptoLocker then demands payment via **Bitcoin** or **MoneyPak** and installs a countdown clock on the victim's desktop that ticks backwards from 72 hours. Victims who pay the ransom receive a key that unlocks their encrypted files; those who let the timer expire before paying risk losing access to their files forever.

This message is left by CryptoLocker for victims whose antivirus software removes the file needed to pay the ransom.

CryptoLocker

Your important files encryption produced on this computer: photos, videos, documents, etc.

If you see this text, but do not see the "CryptoLocker" window, then your antivirus deleted "CryptoLocker" from computer.

If you need your files, you have to recover "CryptoLocker" from the antivirus quarantine, or find a copy of "CryptoLocker" in the Internet and start it again.

**You can download "CryptoLocker" from the link given below.
<http://rvkpjfyxpsocbsn.org/1002.exe>**

**Approximate destruction time of your private key:
10/3/2013 3:00 PM**

If the time is finished you are unable to recover files anymore! Simply remove this wallpaper from your desktop.

ORDER
D1B1B-3AF59-669FD-AAB1D-339EB-5095B-C6A34-16660

Order creation time: Wed, 27 Nov 2013 16:14:25 +0000

Status: KEY PAIR FOUND

Key pair creation time: Fri, 22 Nov 2013 10:59:15 +0000

Key pair expiry time: **Tue, 26 Nov 2013 11:00:15 +0000 (EXPIRED)**

Public key:

```
-----BEGIN PUBLIC KEY-----

Your personal files are encrypted by CTB-Locker.

Your personal files are encrypted by CTB-Locker.

Your documents, photos, databases and other important files have been encrypted with strongest encryption and unique key, generated for this computer.

Private decryption key is stored on a secret Internet server and nobody can decrypt your files until you pay and obtain the private key.

You only have 96 hours to submit the payment. If you do not send money within provided time, all your files will be permanently crypted and no one will be able to recover them.

Press 'View' to view the list of files that have been encrypted.

Press 'Next' for the next page.

WARNING! DO NOT TRY TO GET RID OF THE PROGRAM YOURSELF. ANY ACTION TAKEN WILL RESULT IN DECRYPTION KEY BEING DESTROYED. YOU WILL LOSE YOUR FILES FOREVER! ONLY WAY TO KEEP YOUR FILES IS TO FOLLOW THE INSTRUCTION!

STUN IP Address requests for WebRTC

Demo: <https://diafygi.github.io/webrtc-ips/>

What this does

Firefox and Chrome have implemented WebRTC that allow requests to STUN servers be made that will return the local and public IP addresses for the user. These request results are available to javascript, so you can now obtain a users local and public IP addresses in javascript. This demo is an example implementation of that.

Additionally, these STUN requests are made outside of the normal XMLHttpRequest procedure, so they are not visible in the developer console or able to be blocked by plugins such as AdBlockPlus or

https://diafygi.github.io/v x

← → ↻  https://diafygi.github.io/webrtc-ips/  

Demo for: <https://github.com/diafygi/webrtc-ips>

This demo secretly makes requests to STUN servers that can log your request. These requests do not show up in developer consoles and cannot be blocked by browser plugins (AdBlock, Ghostery, etc.).

Your local IP addresses:

- 

Your public IP addresses:
